DPO Copilot

NDPA 2023 · GAID 2025

NDPA COMPLIANCE, DRAFTED AND APPROVED.

One workspace for Nigerian Data Protection Compliance Organisations: RoPA, DPIA, breach, DSAR and CAR readiness for every client, with a copilot that drafts and a qualified person who approves.

72 h	30 days	100 %	5
Breach notice window (NDPA s.40)	Default DSAR response period	AI drafts approved by a person	CAR readiness categories

THE PROBLEM

COMPLIANCE WORK SHOULDN'T LIVE IN WORD, EXCEL AND WHATSAPP

Rebuilt for every client

The same data map, RoPA, DPIA and policies are recreated from scratch each time, and drift out of sync.

Deadlines tracked by hand

The 72-hour breach window, DSAR deadlines and the annual CAR are followed up across dozens of clients by memory.

Generic AI isn't defensible

Chat tools don't know your client's processing activities or evidence, or Nigerian regulatory specifics.

WHAT'S INSIDE

ONE WORKFLOW FOR EVERY NDPA OBLIGATION

Onboarding and data mapping

A questionnaire your client fills on their phone builds the data inventory and flags likely major-importance status.

DPIA workflow

Seven guided steps with likelihood × impact scoring, review, approval and locked versions.

Breach management

A 72-hour countdown from awareness, with draft notices to the NDPC and to affected people.

Evidence and CAR readiness

Request evidence from clients, accept or reject it, and watch a readiness score across five categories.

RoPA builder

Processing activities proposed from the data map, kept current in one living register.

Policies and notices

Privacy Notice, Data Retention Policy and Consent Form, pre-filled from the client's own data.

Data subject requests

Every request logged with its 30-day deadline, a drafted response and a record of what was sent.

Compliance calendar

Breach, DSAR, DPIA review, evidence and filing deadlines for every client in one list.

DRAFTED BY AI, APPROVED BY PEOPLE

EVERY DOCUMENT PASSES A QUALIFIED PERSON

01
AI draft
Copilot drafts from the client's data

02
Lead review
A qualified person edits and checks

03
Approved
Locked as a version, with who and when

04
Client sign-off
Signed with a one-time code

BUILT FOR DPCOS

MADE FOR HOW DPCOS ACTUALLY WORK

- **Many clients, one dashboard.** Status, open gaps, overdue work, active breaches and readiness for every client, plus one review queue.
- **Your team, the right access.** Firm Admins, Lead Consultants and Associates. Associates see only their assigned clients; only leads approve.
- **A portal for your clients.** Contacts answer questions, upload evidence, sign documents, report breaches and log requests from their phones.
- **Bring your records.** Import clients, contacts and RoPA registers from spreadsheets, checked row by row.

FOR INDEPENDENT DPOS

CERTIFIED DPO? GET PAID WORK

- **Sign in** and show your credentials, then **pick a DPCO** you want to work with.
- **Send a proposal** setting out what you'll take on and your fee.
- **Get tasks** on real client engagements, inside the same guided workflows.
- **Paid directly by the firm.** No tools to buy, and every completed task builds your track record.

YOUR CLIENTS' DATA

CONTROLLED, LOGGED, AND NEVER USED FOR TRAINING

No AI training
Client data is never used to train AI models.

You stay in charge
DPO Copilot drafts notifications and prepares your CAR file; you review, approve and submit them.

Guidance, not legal advice
Regulatory answers cite their sources and support your professional judgement.

JOIN THE PILOT

We're starting with a small group of DPCO firms. Bring your existing client registers and we'll help you get your first client to an audit-ready file. Pricing on request.
